

# PUBLIC WORKSHOPS

## BICYCLE TRANSPORTATION STUDY

### **Bicycle Transportation Study**

The City of Fort Worth is developing a citywide, comprehensive bicycle transportation plan. This plan will set policies, inventory existing bicycle facilities and establish guidelines for future bicycling improvements. The goals of this plan are to:

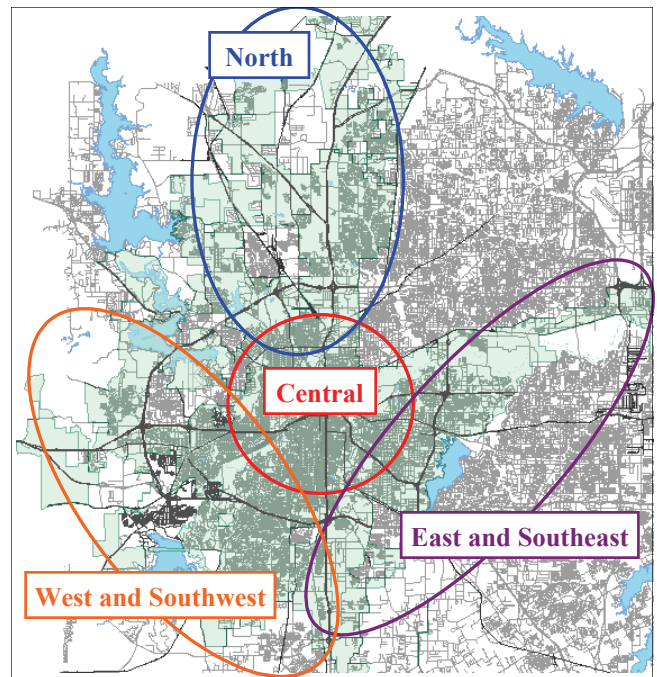

- increase amount of bicycle transportation
- improve bicyclist safety.

### **Public Workshops**

Public workshops are set for November in each of the following areas: West/Southwest, Central, East/Southeast, and North. **Your input is needed.** Please join us in our efforts.

- Tell us:**
- What bicycling facilities you like or need?
  - Where you ride or where you would ride?
  - What are the conditions where you ride?
  - What policies should the City pursue to encourage more bicycling?

Maps will be available for review to better assist with input from the community regarding existing & proposed bicycle facilities.

*The opinions and views of Fort Worth residents are important to us, whether you ride a bicycle everyday or hardly ever.*

### Public Workshops

<b>West and Southwest</b>	<b>Mon. Nov. 5</b> 6-8 p.m.	Lockheed Martin Recreation Assn. (LMRA), River Pavilion, 3400 Bryant Irvin Road
